

Fees and Charges Summary Table

The upfront fees and charges you incur under your loan are shown in the Loan Request Schedule on the front page of your Loan Contract. These include, for example, the loan application fee and credit charges.

As the upfront credit charges are calculated on the assumption you will make all loan instalments on time and in full, if you do not pay amounts when due, you will be charged Additional Interest for the period the amounts due remain unpaid.

The remaining fees and charges in this table are a summary of fees and charges that you may incur, depending on how you make your loan payments and payment behavior during the loan term. See the full terms and conditions [Attvest Documents](#) for more detailed information.
